## LST-TIP-360

## Description

LISAT LST-TIP-360 is a material that has good and high thermal conductivity of $6.0 \mathrm{~W} / \mathrm{m}-\mathrm{K}$ made from Silica Gel Film. With excellent heat conduction and soft silicone heatconducting, the material has a stable insulation performance characteristics of soft and elastic. It has a good contact between the heating device and heat radiating member, effectively improving the heat transfer speed. Commonly used between Semiconductor and Radiating Fin, LED lighting and LED equipment.

## Features and Benefits

- Good \& High Thermal Conductivity of $6.0 \mathrm{~W} / \mathrm{m}-\mathrm{k}$
- Silicone Free Formulation
- Low Hardness
- Low Thermal Resistance
- Execellent Performance Of Heat Dissipation
- Wide Thickness Range

## Typical Applications

@ Between Semiconductor \& Radiating Fin
@ Communication Product
@ Large Power Supply
@ LED Lighting \& LED Equipment
@ LCD Display of Household Appliances
@ Multimedia Products
@ Consumer Electronics
@ Solid State Drive (SSD)

## Properties

Note : Below technical data and information should be thought as typical or representative only and should not be use for specification purpose
